PUBLICATIONS

NeurIPS 2026 (Evaluation & Dataset Track)
"PMO-Dock: Benchmarking Docking, Specificity and Generalization in Molecular Optimization" arXiv
Molecular optimization benchmark

NeurIPS 2026 (AI4DD Workshop)
"Downstream Transfer of Scaling in Molecular Language Models" arXiv soon
Study on scaling laws and downstream transfer in chemical language models

EDUCATION

Yerevan State University, *B.S. in Computer Sciece* 09/2022 – 05/2026
Thesis: Language Models for Molecular Optimization

Armenian Code Academy, *Machine Learning and Data Science* 08/2023 – 04/2024

WORK EXPERIENCE

YerevaNN, *Machine Learning Researcher* 07/2025 – Present
- Train open-source molecular language models (yerevann/ChemLlama-{170M, 380M, 1B, 3B}) available on Hugging Face.
- Construct robust molecular optimization benchmarks.
- Explore scaling laws for chemical language models.
- Investigate and develop advanced algorithms for molecular optimization.

Garderobo AI, *Artificial Intelligence and Machine Learning Engineer* 06/2025 – 08/2025
- Researched industrial applications of AlphaEvolve and Absolute Zero.
- Developed a self-supervised LLM-based pipeline for dataset generation.
- Contributed to experiment design, data preparation, evaluation, and reproducible ML workflows.

CareAware, *Artificial Intelligence and Machine Learning Engineer* 05/2024 – 01/2025
- Processed image and video data using NumPy and OpenCV.
- Fine-tuned YOLO models and trained CV models using PyTorch, TensorFlow, and PyTorch Lightning.
- Deployed models on edge devices using TensorFlow Lite, ONNX, and Coral TPU.
- Developed LLM-based RAG and agentic systems using LangChain and LlamaIndex.

SKILLS

Programming: Python, C++, Bash
Machine Learning: PyTorch, TensorFlow, Scikit-learn, Transformers, Reinforcement Learning, Distributed Training
Data & Scientific Python: NumPy, Pandas, SciPy, Matplotlib
Software Engineering: FastAPI, Flask, Docker, Git, Linux, OOP, Algorithms and Data Structures
Databases: SQL, NoSQL, MongoDB
Infrastructure: Slurm, NVIDIA H100/A100 Clusters, AWS EC2
Languages: English, Russian, Armenian
